

Sonic-Ex

Sonic-Dx 07

Mole-Sonic

Sonic-SF

A professional unit with full-function digital display with digital timer for various skin treatment, the benefits of the thermal effect of capacitive diathermy can be applied to the treatments of deep and localized thermotherapy. It is used in beauty and cosmetic surgery treatments, rheumatology, sports medicine and rehabilitation.

## RESULTS AND BENEFITS

The deep-down thermal effect is the basis of all the benefits of this treatment:

- Stimulation of the blood circulation.
- Trophic and revitalizing effect on the tissues treated.
- Improved deep hydration and skin quality.
- Improved cutaneous permeability and penetration of treatment products.
- Alleviation or elimination of pain due to neuralgia, sciatica, lumbago, etc.
- Relaxing of muscle contractures.
- Improvement in chronic bone and joint disorders.

## TECHNICAL SPECIFICATION

Product Name	:	ULTRASONIC
Max. Output Power	:	10-Watt
	:	Pulse :15-Watt
	:	Continuos :10-Watt
Probe Frequency	:	1 MHz
Effective Area of Active Trasmmitter	:	Watt/cm2
Complies With	:	IEC601-1 Classification
Safety Class	:	I
Type	:	
Operating Temperature	:	10° - 50°
Storage Temperature	:	-10° - 70°

 *Read instructions before use.*

## PHYSICAL CHARACTERISTICS

### SONIC-Ex

Weight	:	2.1 Kg.
Height	:	5"
Width	:	10.5"
Depth	:	7.5"

### SONIC-Dx 07

Weight	:	2.3 Kg.
Height	:	5"
Width	:	10.5"
Depth	:	7.5"

### MOLE-SONIC

Weight	:	2 Kg.
Height	:	4"
Width	:	10.5"
Depth	:	7.5"

### SONIC-SF

Weight	:	2 Kg.
Height	:	3"
Width	:	10.5"
Depth	:	7.5"

## MODE OF ACTION AND TREATMENTS

The Ultrasonic is microprocessor-controlled, which means the reliability of its treatment parameters is guaranteed. Its operation has been simplified to ensure safe, fast and easy application. The benefits it provides justify its use in numerous applications: (Cosmetic conditions: due to its trophic effect, wrinkles, stretch marks, flaccidity, acne at the scarring stage, cellulite. Localized oedema, puffy eyes, etc. For stimulating the blood circulation. For improving trans-epidermal penetration of cosmetic or treatment products.)

- Painful neurological syndromes: neuritis, Neuralgia, etc.
- Back conditions: neck pain, middle back pain, lower back pain and sciatica.
- Rheumatic joint disease.
- Sub-acute or chronic sprains and distended ligaments.
- Muscle contractures, torticollis, etc.
- Retractions and fibrotic processes.
- Sequelae from contusions and torn muscles.
